

# BAUMA – The Challenge for Logistics Companies

BAUMA has once again opened its doors and, as the world's largest trade fair of its kind, is the innovation driver of the industry. With over 4000 exhibitors and brands and approx. 600,000 visitors from all over the world, it is the guarantee of success for our customers in the construction machinery sector.

But how do the super and extra heavy machines get to the fair? It is hard for the individual to keep track of the logistics costs! Here DS-Spedition was able to offer its national and international customers exactly the logistics and transport service that is absolutely necessary for a successful trade fair participation.

With the massive use of our vehicle fleet, consisting of heavy transporters, articulated lorries and tarpaulin covered vehicles, we were able to guarantee our customers on-time delivery of the partly gigantic machines and were able to implement the deliveries on time.

So, nothing stands in the way of our partners' trade fair success!

And after the trade fair? **Prepare for the next one!**

## About DS-Spedition
