

## New Logistics Centre in Slovenia

### *DS Spedition sets up new platform for its Asia transports to Eastern Europe*

Special projects require special expertise! With our new DS-logistics centre in Slovenia, we now incorporate an ideal connection to the seaport of Koper. The new hub significantly shortens the routes to Eastern and Southern Europe. In addition to its excellent geographical position, Koper also offers a well-developed infrastructure. Short transit times and the opportunity to offer binding delivery dates make the location to the ideal port of departure and destination for our business with the Far East.

In our new DS-logistic centre we organize and manage our clients' complete logistical processes for Eastern and Southern Europe. From quality check to customs clearance, distribution and warehousing, we take charge of all relevant steps. Our clients can count on our know-how and experience. Thanks to our local office, we can assure a smooth carriage, even if it comes to short-term changes.

Furthermore, owing to the relevant shortening of 1100 km of the routes of transport, our local DS-logistic centre in Koper enables us to realize significant cost savings for our clients for the following destinations:

GER-Bavaria  
Slovakia  
Hungary

Switzerland  
Southern Poland  
Slovenia

Czech Republic  
Austria  
Croatia

In the area of warehousing, our new platform takes over all relevant requirements and tasks, such as customs clearance, unloading, palletization, storage, processing of goods, picking procedures, inventory management, quality record and customs storage.

The distances between economical centres and sales markets all over the world are fixed. Finding the perfect solution to connect those with each other through different means of transport is our challenge. Accordingly, the DS-team constantly develops innovative logistical concepts for the successful carriage of any kinds of economic goods.

Located, in Munich, Berlin, Cologne, Hamburg and Moscow, DS Spedition is a full service provider for all logistic fields and the ideal partner for external supply chains. No matter if it is about trucking, combined freight traffic, warehouse management or special logistics, the DS Spedition encompasses special divisions for any task. These can provide the optimal solution for any individual case and client.
