

Shovel loader for Mongolia

A new logistics challenge for the DS-Spedition!

The demand of the customer was to deliver 9 CAT crawler excavators Type RH 170B with a rock bottom-dump bucket equipment directly from Germany to different mines in Mongolia.

After an intense stage of planning and preparing we were able to start the implementation. From Bremen transported by sea, the **9 hydraulic excavators** with a weight between **400 and 900 tonnes** arrived at the East Asian region. Subsequently they were transported by rail and street to the respective mines in Mongolia.

Data in overview:

- 9 excavators
- CAT crawler excavators Type RH 170B with a rock bottom-dump bucket equipment
- Between 400 to 710 tonnes per item
- Shipment via Bremen
- A direct delivery at different mines in Mongolia
